

GUIDED TRAINING ACCELERATES TIME-TO-PRODUCTIVITY

Augmented Reality Smart Glasses by Moverio

Employee training is transforming to boost the new economy. Classroom training and employee onboarding are no substitute for real-world experience. How can you accelerate training so employees get up to speed quickly?

Smart glasses can help employees learn fast

by delivering critical information such as assembly guidelines and step-by-step instructions in a hands-free way.

Capture and provide 2D and 3D data plus step-by-step instructions.

Streamline knowledge transfer with in-context overlay data and precise guidance to help build accumulated knowledge.

Boost retention by providing digital assets and presenting information in a way that aids self-paced training.

ROI can be immediate with:

Time savings on learning about new equipment and assembly instructions.

Faster access to the most up-to-date instructions, organizational requirements and product information.

Enhanced employee retention and experience that leverages emerging technologies.

Fast-track training can be more rewarding for employees and the company.

Equipping new hires with the latest in AR technology can help accelerate their time-to-productivity.

Moverio streamlines training workflows for faster utilization of new hires.
